SUSTAINABLE PRACTICES

RECYCLING

All site waste is recycled, reused or repurposed - we target 100% of site waste to be **diverted from landfill** - supporting our Net Zero journey.

ENERGY

To cut fossil fuel use, we generate our own heating on-site using surplus materials to produce **sustainable biomass energy**. We're investing in solar power and battery storage to help make our operations fully electric.

GREEN TRANSPORT

It is our policy that all new fleet vehicles are electric. We encourage our staff to car share, we provide a cycle to work scheme and **EV charging** facilities at our HO.

RESPONSIBLE MANUFACTURING

LIGHTING

We've installed low-energy lighting and smart systems that automatically switch off in low-traffic areas. **Cutting energy waste** and improving efficiency.

PROGRESS

Demonstrating our commitment and accountability to becoming carbon neutral, we monitor and record all our emissions - successfully **establishing our baseline** - and we continue to track progress.

EFFICIENCY

Our advanced woodworking equipment combines multiple **energy saving processes** (e.g. energy efficient saws and dust collecting) cutting energy use. All machinery is powered down when not in use.

SUPPLY CHAIN & THE FUTURE

SUPPLY CHAIN

We target **100% local** suppliers. Our vigorous pre-selection qualification process ensures our suppliers work to our ISO 14001 standards.

CERTIFICATION

Richmond is proudly **ISO 14001** certified and alongside all our suppliers form part of the FSC® certified supply chain, ensuring all timber is sourced from responsibly managed forests.

NET ZERO

Richmond is a supplier you can trust to support your Net Zero goals. We implement carbon reduction processes across all business activities to achieve a **Net Zero future**.
